Foreword

This publication comprises a series of revised demographic statistics covering the period 2005-2012.

The revised data are the result of an extensive exercise which has been carried out by the Population and Tourism Statistics Unit in order to align demographic figures with the data made available by the Census of Population and Housing 2011. Furthermore, detailed demographic statistics in respect of 2011 and 2012 are included.

When analysing the data presented in the tables as well as emerging trends, users are encouraged to consult the methodological notes. The Office would like to thank the data providers who supply crucial information required for the compilation of these statistics.

I would like to take the opportunity to thank the staff of the Population and Tourism Statistics Unit for their meticulous work and for compiling this interesting and useful publication.

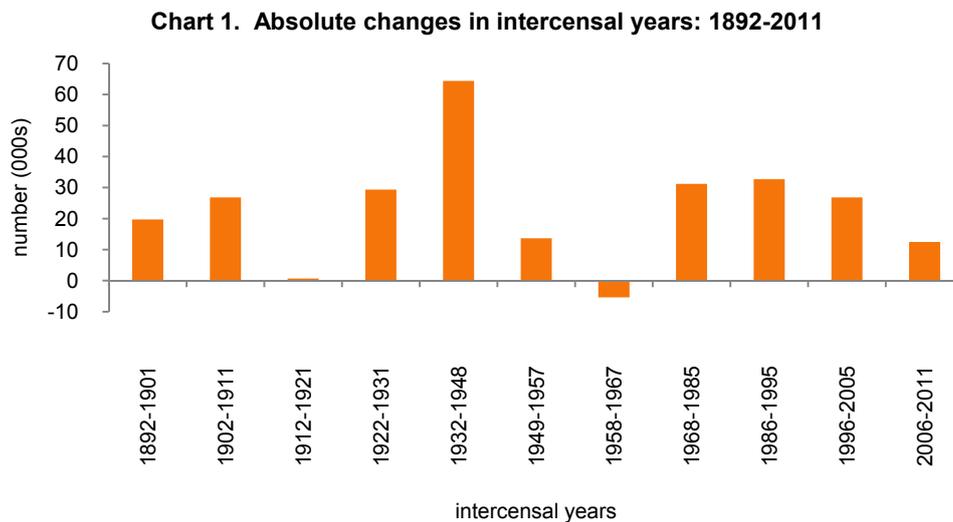

Joseph Bonello
Acting Director General

January 2015

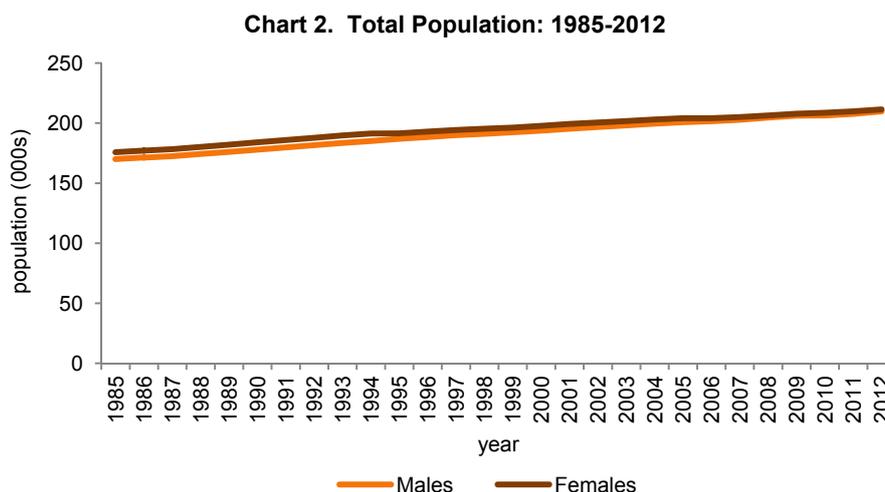

Commentary

1. Population

Censuses held during the last 120 years showed a general increase in the enumerated population between one census year and another. On average, an increase of 23,000 persons is noted between each decennial cohort. The only population decrease was observed between the census periods 1957 and 1967, where the enumerated population decreased by 1.7 per cent (Chart 1). The total enumerated population recorded from the 2011 Household and Population Census stood at 417,432.

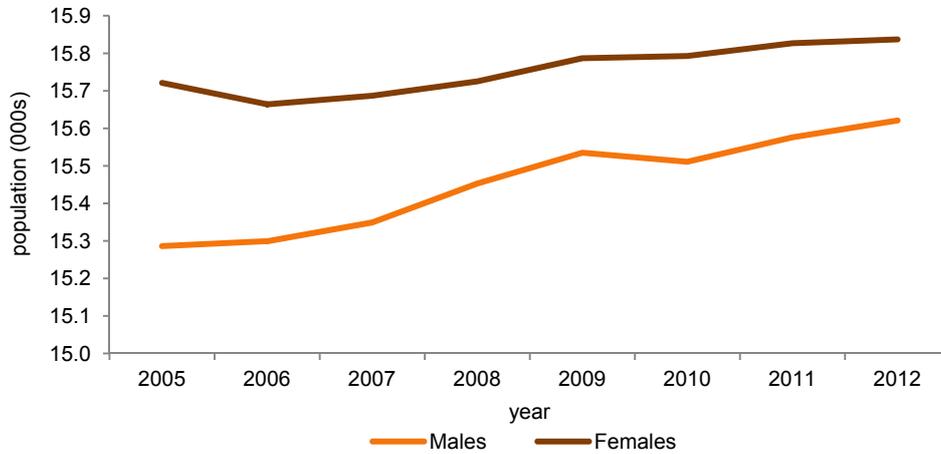

The total population in Malta was estimated at 421,364 as at the end of 2012, an increase of 21.9 per cent when compared to the 1985 figure. Chart 2 also demonstrates that differences in population counts between males and females is following a diminishing trend, although a minor discrepancy between the two gender counts persists.

The Maltese population also registered a significant increase of 17.0 per cent during the past 27 years, reaching 398,898 as at the end of 2012. The period under review also saw a growth in the influx of foreign residents, resulting in an increase in the share of foreign residents in the total population, from 1.4 per cent in 1985 to 5.3 per cent by the end of 2012.

When analysing the total population by region of residence for the period 2005-2012, an increase of 4.3 per cent was recorded in the total population residing in Malta. Furthermore, persons residing in Gozo increased by 1.5 per cent, amounting to 31,458 residents or 7.5 per cent of the total population as at the end of 2012. During this period, the male population residing in Gozo increased by 2.2 per cent while that for females increased by 0.7 per cent.

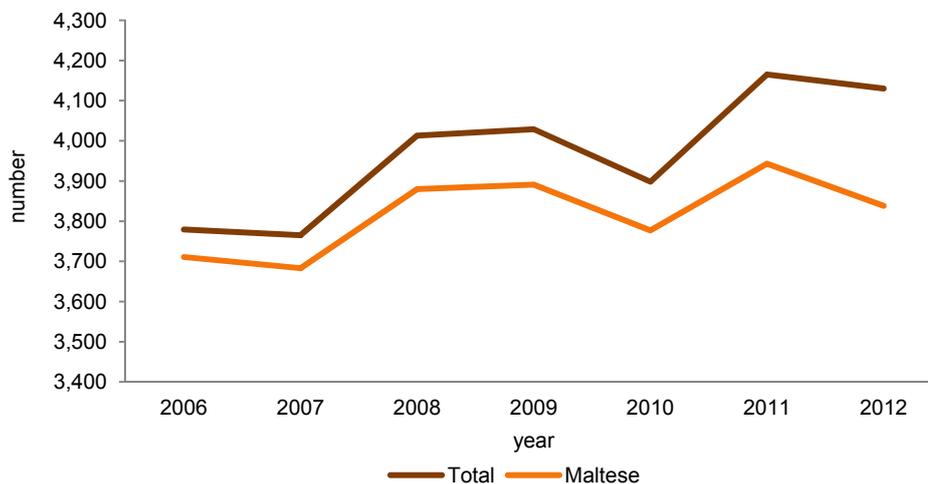

Chart 3. Total Population in Gozo: 2005-2012

2. Births

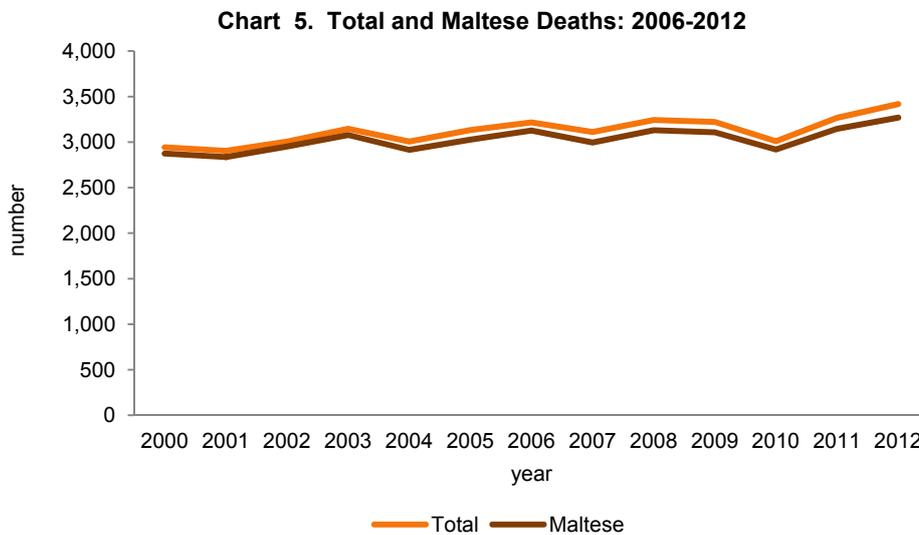

During the period 2006 - 2012, an average of 4,000 resident babies were born and registered annually with the Public Authorities. Of these, an average of 3,800 resident babies had a Maltese citizenship. Just over half of the total births were boys. Resident babies with Maltese citizenship decreased from 98.2 per cent of total births in 2006 to 92.9 per cent in 2012.

Chart 4. Total and Maltese Resident Live Births: 2006-2012

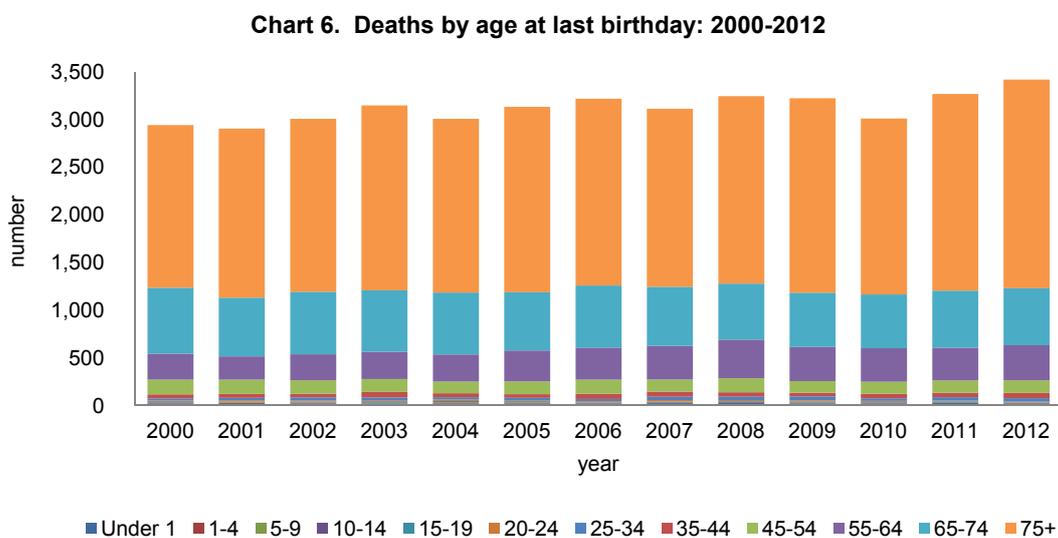

3. Deaths

The total number of deaths registered during 2012 stood at 3,418, an increase of 16.2 per cent compared to total number of registered deaths during 2000.

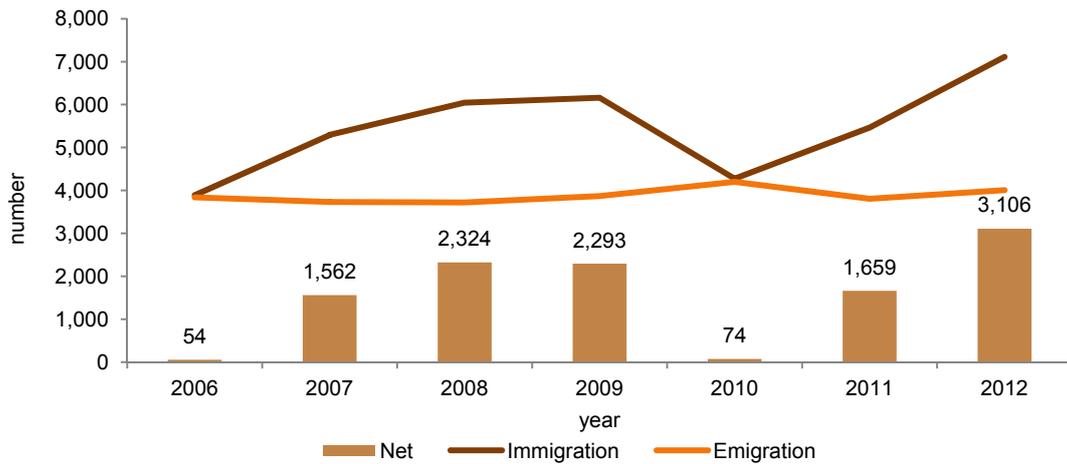

During the thirteen year period under review, more than half of all registered deaths involved persons aged 75 or more. Since 2006, decreases in total registered deaths were recorded in the 1-9, 45-54 and 65-74 year old age cohorts. On the other hand, there was an increase in registered deaths involving persons aged between 25 and 34, and persons aged 55 to 64 years.

4. International Migration

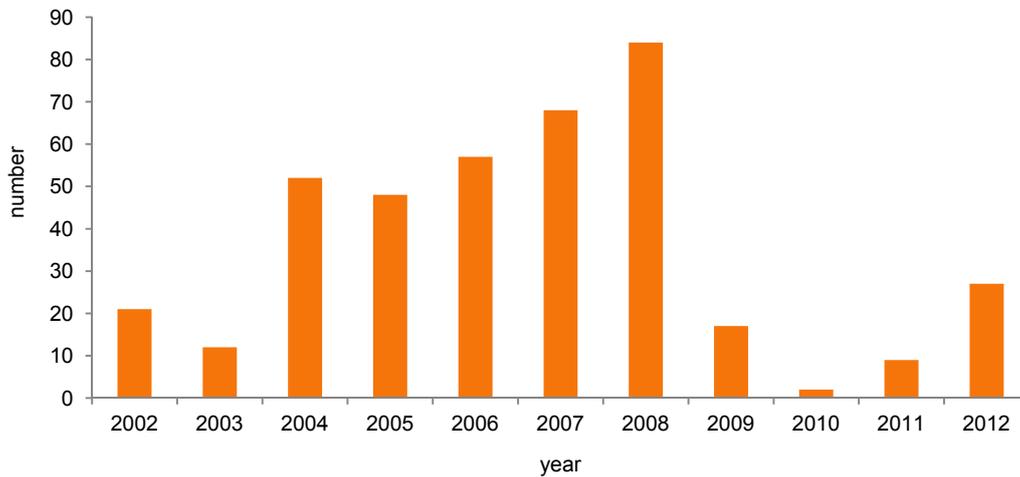

A positive net migration was recorded during the period 2006-2012, as shown in Chart 7. This net migration ranged from 54 persons in the year 2006 to 3,106 during 2012. Fluctuations in net migration figures were mainly caused by highly irregular patterns of total immigration flows, which are also clearly demonstrated in Chart 7. During the period under review, the vast majority of migrants were males.

Chart 7. Annual migration flows: 2006-2012

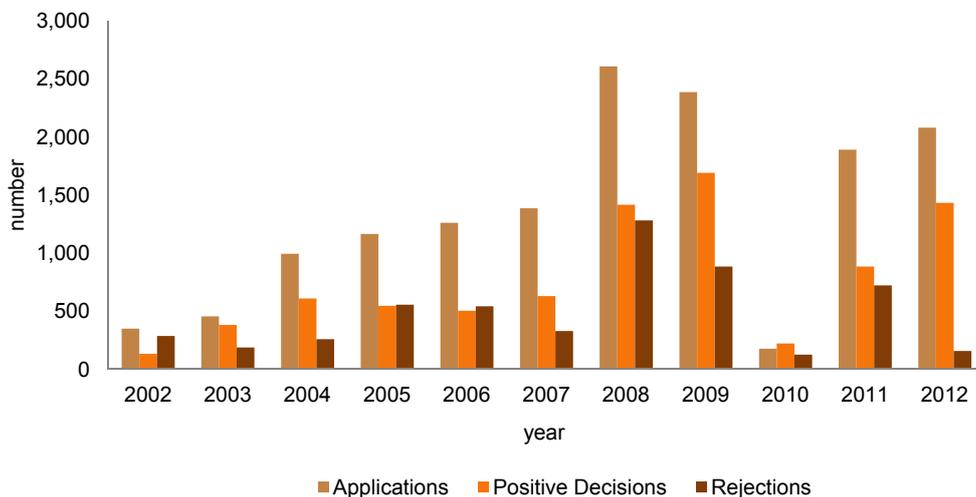

Significant changes in arrivals of irregular immigrants by sea were also noted during the period under review, as shown in Chart 8.

Chart 8. Boats arriving in Malta with irregular immigrants: 2002-2012

With the exception of 2010, from 2002 onwards, the Office of the Refugee Commissioner registered annual increases in the number of applications for asylum. In general, the majority of persons granted a positive decision were given subsidiary protection or other forms of protection. In 2012, 97.6 per cent of the positive decisions granted were subsidiary protection status or other forms of protection, while the remaining 2.4 per cent were granted refugee status.

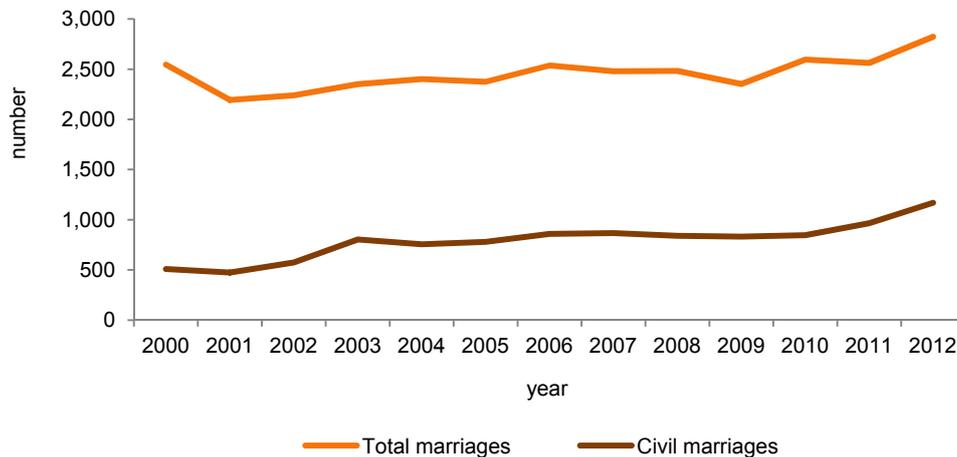

Chart 9. Asylum applications and decisions taken by the Office of the Refugee Commissioner: 2002-2012

5. Family formation and dissolution

During the 13-year period under review, an increase of 10.9 per cent in the total number of registered marriages was recorded. Civil marriages increased by 129.9 per cent, while religious marriages decreased by 18.8 per cent. These figures comprise all marriages registered by the Maltese authorities, including marriages between foreign couples who do not intend to reside in Malta and can thus be referred to as tourists. The second quarter of each year proved to be the most popular period selected by couples getting married.

Chart 10. Number of marriages occurring in Malta and Gozo: 2000-2012

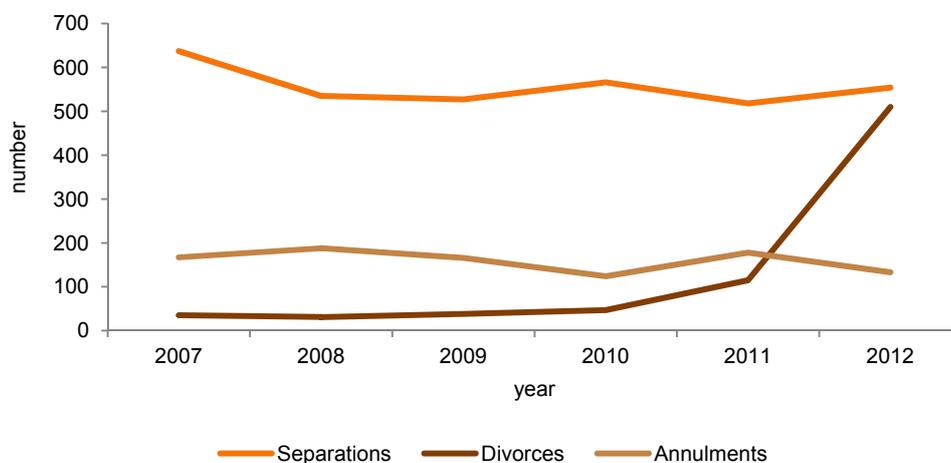

A decrease of 13.0 per cent was registered in the total number of registered separations in 2012, when compared to 2007. The majority of these separations involved couples where both spouses were Maltese citizens.

A sharp increase in the registered divorces has been observed, after the introduction of the divorce legislation in Malta in October 2011. In 2012, 86.5 per cent of the divorces registered were obtained from Malta.

During the period 2007-2012, an average of 159 annulments were registered every year. Registered annulments exhibited a declining trend since 2008, except during 2011, where an increase of 43.5 per cent was observed when compared to the previous year. The highest number of annulments was registered during 2008, while the lowest number was recorded during 2010, at 188 and 124 respectively.

Chart 11. Registered separations, divorces and annulments at the Public Registry: 2007-2012

Definitions and Methodological Notes

1. Usual Residence (according to the European Regulation (EC) No 1260/2013)

- **Usual residence** refers to the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone shall be considered to be usual residents of a specific geographical area:
 - those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or
 - those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.
- **Usually resident population** means all persons having their usual residence in a Member State at the reference time. Unless otherwise stated, all figures in this publication refer to this reference population.

2. Population

All population components are based on definitions provided for in the European Regulation (EU) No 1260/2013 on European demographic statistics.

- **Total Population** figures include both Maltese and foreign residents. The total population at the end of year t , is computed using the following equation:

$$P_t = P_{t-1} + B_t - D_t + I_t - E_t, \text{ where}$$

- P_t is the total resident population at the end of year t ,
 - P_{t-1} is the total resident population at the end of year $t-1$,
 - B_t is the total number of births born to mothers resident in Malta registered during year t ,
 - D_t is the total number of deaths of persons resident in Malta registered during year t ,
 - I_t is the total immigration of both Maltese and foreign nationals registered during year t who immigrated with the intention to live in Malta for a period of at least 12 months.
 - E_t is the total emigration of both Maltese and foreign nationals resident in Malta registered during year t who leave the country for a period of at least 12 months.
- **Maltese population** figures include Maltese residents only. The Maltese population at the end of year t is computed using the following equation:

$$P'_t = P'_{t-1} + B'_t - D'_t + I'_t - E'_t, \text{ where}$$

- P'_t is the Maltese resident population at the end of year t ,
- P'_{t-1} is the Maltese resident population at the end of year $t-1$,
- B'_t is the number of Maltese births born to mothers resident in Malta registered during year t ,
- D'_t is the number of deaths occurring to Maltese citizens resident in Malta during year t ,
- I'_t is the total immigration of Maltese nationals registered during year t who immigrated with the intention to live in Malta for a period of at least 12 months.
- E'_t is the total emigration of Maltese nationals during year t who leave the country for a period of at least 12 months.

Maltese and total **mid-year populations** are calculated by averaging beginning and end-year population estimates.

3. Births

- **Total live births** include all babies being born and registered with the Public Authorities in Malta. All still births are excluded. The **crude birth rate** is the number of total live births per thousand mid-year population.
- **Live births resident in Malta** include all babies whose parent(s) is(are) resident in Malta during time of birth. Thus all births born to mothers resident abroad are being excluded.
- **Maltese live births** include all babies being born and registered with the Public Authorities in Malta having a Maltese father or a Maltese mother in the case they are born within wedlock, and having a

Maltese mother in the case they are born outside wedlock. The **Maltese crude birth rate** is the number of Maltese live births per thousand mid-year Maltese population.

- **Total fertility rate** is the number of children that would be born to a woman if she were to live to the end of her child bearing years and bear children in accordance with current age-specific fertility rates.
- **Live-birth order** is the numerical order of the live birth being recorded in relation to all previous live births of the mother. In the case of multiple issue, each live-born is counted separately.
- **Maternities** include both still and live births. Multiple births are counted as one maternity.

4. Deaths

- **Total deaths** include all registered deaths of Maltese and foreign nationals resident in Malta and Gozo. This count excludes tourists but includes Maltese residents who die abroad. Total deaths exclude still births. The **crude death rate** is the total number of deaths per thousand mid-year total population.
- **Maltese deaths** include all registered deaths of Maltese nationals resident in Malta and Gozo. This count includes also Maltese residents who die abroad. Still births are also excluded. The **Maltese crude death rate** is the number of Maltese deaths per thousand mid-year Maltese population.
- **Still births** are deaths occurring to babies prior to the complete expulsion or extraction from its mother of a product of conception, after 22 weeks of gestation.
- **Neonatal deaths** are deaths occurring within the first 28 days after birth.
- **Infant deaths** are deaths occurring during the first year of life. **Infant mortality rate** is the number of infant deaths per thousand life births.
- **Life expectancy at birth** is the number of years a newborn is expected to live if mortality in the various age-groups remains at the level of the period in which the expectation of life is computed.

5. Migration

- **Immigration** is the action by which a natural person establishes his or her usual residence in a territory of a State for a period that is, or is expected to last a minimum of 12 months. This figure is measured by summing up the count of all new employment engagement forms and residence permit holders, their dependents, asylum seekers under protection, returned migrants and new adoptions of children from foreign countries.
- **Emigration** is the action by which a natural person leaves his or her usual residence in the territory of the Member State for a period that is, or is expected to last a minimum of 12 months. This figure is measured by summing up the counts of all employment termination forms which ended during the reference year, residence permit holders who fail to extend their permits during the year under review, together with their dependents, resettled or repatriated asylum seekers who were previously given protection and other Maltese emigrants (i.e. persons who leave the country for a period of at least 12 months).
- **Asylum applicant:** A person having submitted an application for international protection to the Office of the Refugee Commissioner.
- **Application for asylum:** The application made by a third-country national, or stateless person, which can be understood as a request for international protection from a Member State, under the Geneva Convention. Any application for international protection is presumed to be an application for asylum (including requests for refugee status or for subsidiary protection status) unless a third-country national or a stateless person explicitly requests another kind of protection that can be applied for separately. An application for asylum is deemed to have been lodged once a form is submitted by the applicant for asylum or a report prepared by the authorities has reached the competent authorities.
- **Refugee:** A third country national who, owing to a well-founded fear of being persecuted for reasons of race, religion, nationality, political opinion or membership of a particular social group, is outside the country of nationality and is unable or, owing to such fear, is unwilling to avail him/herself of the protection of that country, or a stateless person, who, being outside of the country of former habitual residence for the same reason as mentioned above, is unable or, owing to such fear, unwilling to return to it (Art.2(d), Directive 2004/83/EC).

- A third country national or stateless person is granted the Geneva Convention status (also referred to as **Refugee status**) if, owing to a well founded fear of being prosecuted for reasons of race, religion, nationality, political opinion or membership of a particular social group, is outside the country of nationality and is unable or, owing to such fear, is unwilling to avail him/herself of the protection of that country.
- Person eligible for **subsidiary protection** is a third country national, or stateless person, who does not qualify as a refugee but in respect of whom substantial grounds have been shown for believing that the person concerned, if returned to the country of former habitual residence, would face a real risk of suffering serious harm, or owing to such risk is unable to avail him/herself of the protection of that country.
- Person covered by a decision granting authorisation to stay for **humanitarian reasons** under national law concerning international protection is a person who is not eligible for international protection but is nonetheless protected against removal.
- **Rejected applicant:** A person covered by a decision rejecting an application for international protection under consideration by the responsible national authority.
- **Unaccompanied minors:** Third-country nationals or stateless persons below the age of 18, who arrive on the territory of the State unaccompanied by an adult responsible for them whether by law or custom, and for as long as they are not effectively taken into the care of such a person; it includes minors who are left unaccompanied after they have entered the territory of the State (Art.2(i), Directive 2004/83/EC).
- The term **Third-country Nationals** refers to Non-EU Citizens.
- Third-country nationals found to be **illegally present** are nationals who are officially found to be on the territory of the State and who do not fulfil, or no longer fulfil, the conditions for stay or residence in the State.
- **Registration** is the action by which foreign residents register themselves as Maltese citizens at the Citizenship and Expatriate Affairs Department. Registered persons are included in the Maltese population count.
- **Naturalisation** is the action by which a foreigner may be granted a Maltese citizenship according to the Maltese Citizenship Act.

This domain comprises the compilation of statistics on international migration, as stipulated by Article 3 of the European Regulation (EC) 862/2007. The work is carried out by NSO in collaboration with other Government Entities who provide access to administrative records for the compilation of these statistics. These include:

- **Immigration of Maltese Nationals**
 - NSO: Most recent Census of Population and Housing
 - NSO: Labour Market Statistics - Household survey: Labour Force Survey
- **Emigration of Maltese Nationals**
 - NSO: Population and Tourism Statistics - An on-going frontier survey: TOURSTAT
- **Migration flows of EU nationals**
 - Employment and Training Corporation (ETC) - Employment engagement and termination forms
- **Migration flows of Third Country Nationals**
 - Office of the Refugee Commissioner - Asylum statistics
 - Third Country Nationals Unit - Resettlements and Repatriations
 - Citizenship and Expatriates Affairs - Residence Permits Database.

Some of the migration components have been estimated using auxiliary information like data obtained from the 2011 Population and Housing Census and other register data. All statistics are compiled basing on harmonised methods stipulated by the Regulation, in order to ensure comparability of results across participating countries.

- **Immigration of Maltese Nationals**
 - Immigration of Maltese nationals is calculated based on figures extracted from the most recent Census of Population and Housing using the information collected regarding residence one year prior to the Census. Using the same question from the Labour Force Survey, the change observed between the year when the census has been undertaken and the reference year is applied on the Census figures.
- **Emigration of Maltese**
 - Emigration of Maltese nationals is calculated based on the figures resulting from the Tourstat border survey for Maltese Nationals travelling from Malta. The duration of trip is analysed and an average number of persons who intend to stay away from Malta for 12 months and over of the past 3 years is calculated.
- **Migration flows of EU nationals**
 - Immigration of EU Nationals is calculated based on the figures of engagement forms presented by the ETC for the reference year in question. These are then linked to the termination of employment data in order to remove persons who have not been in employment for at least 1 year. The data is then checked with the ID Card database (CDB) in order to remove persons who were registered in Malta prior to the reference year.
 - Emigration of EU Nationals is calculated based on the termination of employment data. Therefore persons who terminated their job and have not been re-employed are considered as emigrants.
 - Both immigration and emigration of the dependents of EU Nationals are calculated based on a factor extracted from the most recent Census of Population and Housing.
- **Migration flows of Third Country Nationals (TCN)**
 - Asylum Statistics:
 - Immigration: The database held at the Office of the Commissioner for Refugees (REFCOM) is used to extract persons covered by first instance decisions who have been granted refugee status, subsidiary protection status or temporary protection.
 - Emigration include resettled persons, ie third-country nationals who, on a resettlement request from UNHCR based on their need for international protection, are transferred to a Member State where they are permitted to reside.
 - Residence Permits:
 - Immigration of TCN is calculated based on the permits which hold a duration of at least 1 year. These are then linked to with the ID Card database (CDB) and the ETC Database in order to remove persons who were registered in Malta prior to the reference year.
 - Emigration of TCN includes persons whose permit has not been extended and who have had a viable permit for more than a year.

6. Family formation and dissolution

- **Total marriages** include all marriages registered in Malta and Gozo. This count also includes marriages between non-resident foreign spouses. The **crude marriage rate** relates the number of marriages per thousand mid-year total population.
- **Civil marriages** include all non-religious marriages that are recognised by law in Malta.
- Data on **separations** has been extracted from records held at the Public Authorities in Malta and Gozo of separations involving both Maltese and/or foreign spouses that have been concluded by a legal contract.
- Information on registered **annulments** of religious and civil marriages between Maltese and/or foreign spouses is as according to records held at the Public Authorities in Malta and Gozo.
- **Divorces** obtained in Malta include both Maltese and foreign spouses. Divorce registration was introduced in Malta at the end of 2011 (Civil Code Amendment Act, 2011 (Act XIV of 2011)).

- **Divorces** obtained abroad of marriages involve both Maltese and foreign spouses. This includes those divorces that were accepted by the laws of Malta in terms of section 33 of the Marriage Act (1975) and are registered at the Public Authorities in Malta and Gozo.

7. Classifications

- Localities are classified into districts according to the Malta Geographical Codes (MGC) as follows:
 - Southern Harbour – Valletta, Senglea, Cospicua, Haż-Żabbar, Fgura, Floriana, Kalkara, Hal Luqa, Marsa, Paola, Santa Lucija, Hal Tarxien, Xgħajra
 - Northern Harbour – Hal Qormi, Birkirkara, Gżira, Hamrun, Msida, Pembroke, Tal-Pieta`, St Julian's, San Ġwann, Santa Venera, Tas-Sliema, Swieqi, Ta' Xbiex
 - South Eastern – Żejtun, Birżebbuġa, Gudja, Hal Għaxaq, Hal Kirkop, Marsaskala, Marsaxlokk, Mqabba, Qrendi, Hal Safi, Żurrieq
 - Western – Mdina, Haż-Żebbuġ, Siġġiewi, F'Attard, Hal Balzan, Had-Dingli, Iklin, Hal Lija, Rabat, Mtarfa
 - Northern – Hal Għargħur, Mellieħa, Mgarr, Mosta, Naxxar, St Paul's Bay
 - Gozo and Comino – Victoria, Fontana, Għajnsielem and Comino, Għarb, Għasri, Ta' Kerċem, Munxar, Nadur, Qala, San Lawrenz, Ta' Sannat, Xagħra, Xewkija, Żebbuġ
- Occupations are coded according to the International Standard Classification of Occupations (ISCO).
- Deaths by causes are classified according to the International Classification of Diseases (ICD).

8. Other notes

- Population figures have been revised further to the results of the 2011 Household and Population Census.
- Following the 2011 Household and Population Census, population figures were revised in accordance to the usual residence definition.

9. Sources

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^{\circ}e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.
